

When you land on the first page of our application, you can view all the projects that are created by other users. You can search on a specific project or filter a project based on your favorite category. (Located on the top left of the page).

To create your own projects, you must first create an account or login. The buttons are located on the top right of the page.

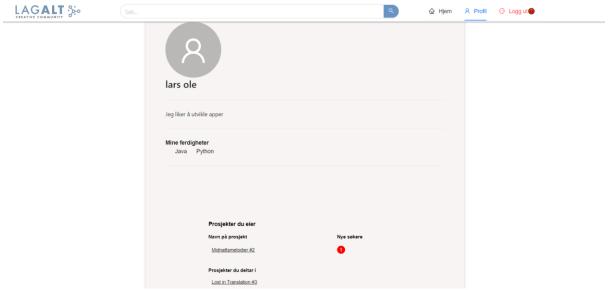

After pressing the login button, you will be redirected to a keycloak page that looks like the picture above.

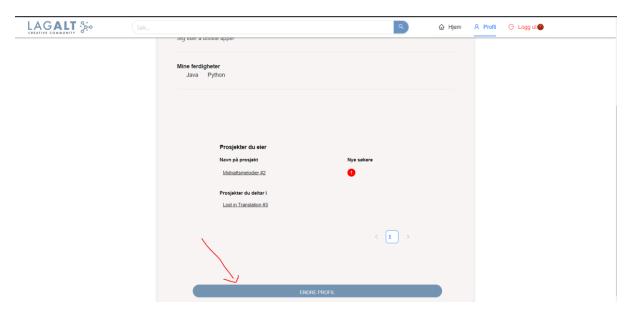

## LAGALT User manual

After logging in you can now see a dropdown of a "profil" to view your profile, "nytt prosjekt" to create new project and "prosjektet ditt" to look at the project that you have created and to look at who joined your project.

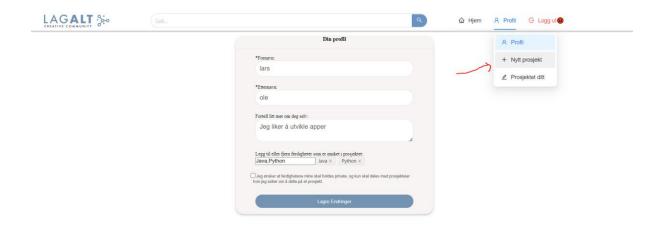

When you press on the "profil" button inside the dropdown, you will be redirected to profile page. Here you can view your First and Last name, your description, skills and you can also view the projects you own and projects you participate in.

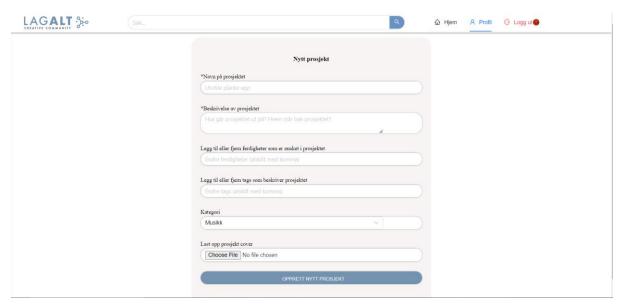

To update your profile, you can scroll down on the profile page and press on the "ENDRE PROFIL".

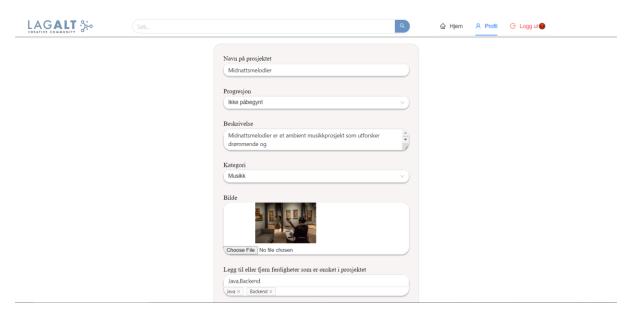

Here you have an input field to update First name, Last name, description and skills. After pressing "LAGRE ENDRINGER" your new profile information will be updated.

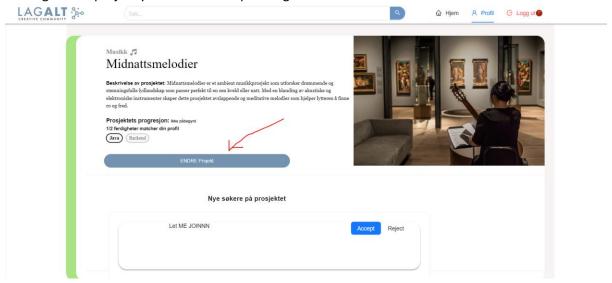

To create new project, you need to press on the "Nytt prosjekt" button inside the profile dropdown.

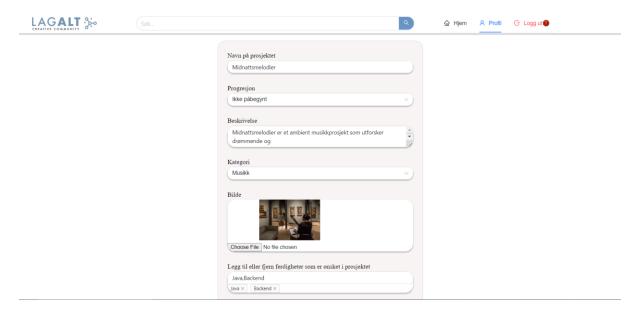

Here you must provide project name, project description, skills, Tags, category of the project you want to create and upload an image that represents your project. After filling the fields, you can press the "OPRETT NYTT PROJEKT" button and your new project will be added. Others can now view your project on the frontpage and can apply to join.

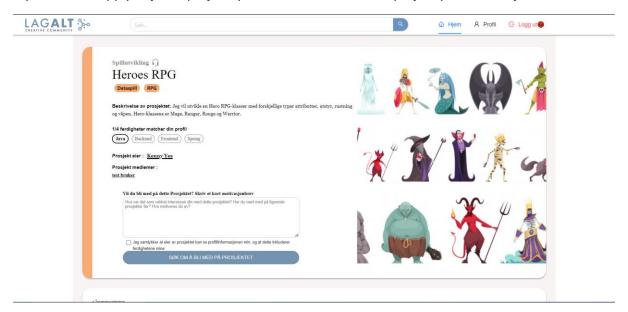

If you are not satisfied with the project you have created, you can update it. This can be done by clicking on the project you created and pressing on the "ENDRE PROSJEKT" button.

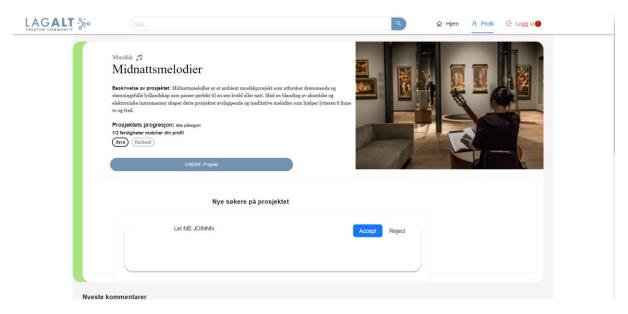

After pressing on the button, you will be redirected to update project page, here you can update the progression of the project, the name, the description or upload new image.

If you want to apply to join a project, you must first click on the project you want to join.

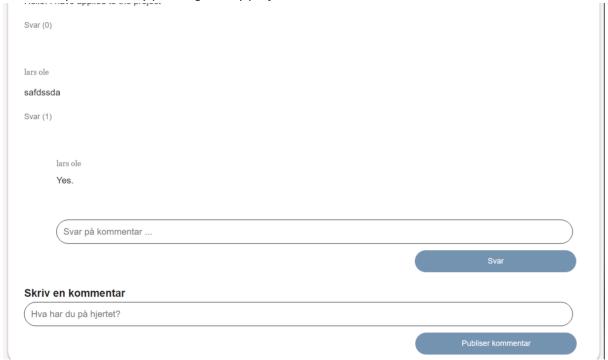

After clicking on a project, you can see the skills for the project, the project owner, project members and description of the project. To apply, you must write a motivation letter, accept the terms and press on the "SØK OM Å BLI MED PÅ PROSJEKTET" button.

The person you have applied to will receive this when clicking on their project. Here they can either accept or reject your request.

Lastly, the web application has the comments functionality. You can communicate with others Lagalt community members by pressing on any project and scroll down to the comment section.

Here you can either comment or reply to a comment.
